G. & R. Summer Grown, Winter Rested, Own Root Roses

Very few persons, even in the trade, realize to what mammoth proportions the own root Rose business has reached in the past few years. Our business has grown by leaps and bounds, and the end is not yet. It's easy to understand why. Because G. & R. own root Roses give satisfaction. They grow and bloom; they work year in and year out; they have permanency. Not so the budded Roses that are like "a flash in the pan" and gone. No wonder when the customers know about budded Roses they absolutely refuse to purchase and no one blames them. Give your customers the best, and the best are G. & R. own root Roses.

The Largest Rose Growers in the World

Although our stock of Roses for 1917 was several hundred thousand more than we ever grew, still we sold out early in the season and were compelled to turn down orders for three-quarters of a million Roses we could not supply.

One of our customers in Oregon says: "Several years ago we bought your Roses, then we made the attempt to grow them ourselves, then again we tried the California-grown Roses, but we are back with you and we are back to stay. No Roses do so well with us as the G. & R. Roses. We expect to plant more largely of your Roses each year." This is why G. & R. Roses are finding a ready market everywhere they are tried.

Rose After-Satisfaction

When you buy G. & R. Roses you get along with them the after-satisfaction—that sense of realizing all the success that should come from planting quality Roses, the knowing that no better results are possible to be obtained outside of G. & R. Roses. It is the after-satisfaction that has compelled us to plan to grow for the coming season one million additional Roses. Think of it, the after-satisfaction of selling six million Roses, and demanding a million increase in one year. Going some! you say. Yes, but are you getting your share of this Rose after-satisfaction? If not, why not? Plant G. & R. quality Roses. None better, none so good.

HYBRID TEA ROSES

New Varieties and a Few that are Scarce

This is a class of recent creation, embodying the delicate shades and peculiar fragrance possessed by the Tea Roses combined with the vigor and more pronounced pink and crimson shades of color previously confined to the Hybrid Perpetual class. In our opinion the Hybrid Teas will supersede all others because of their superior constitution and marvelously free-flowering qualities. In a sentence, it may be said they combine all the better traits of the two classes from which they sprang, altogether a great advantage. Almost all are highly perfumed, an attribute absolutely essential to a perfect Rose. They are ever-bloomers and hardy in all but the most rigorous climate.

ADMIRAL WARD (Pernet Ducher, 1915)—Large, full, globular flowers freely and continuously produced. Color crimson-red, shaded fiery-red and velvety crimson. Fine bedding variety.

AUTUMN TINTS—(B. R. Cant & Sons, 1914)—Copper-red shaded with orange and salmon; flowers produced in great profusion. An exceedingly attractive garden Rose. Similar in color to Mme. Edward Herriott. Very lovely.

CHAMP WEILAND (Weiland, 1916)—This is the new Killarney; said to be a great improvement.

CHEERFUL (McGredy, 1915)—Pure orange-flame, the flame tints overspreading the petals, giving it a wonderful and pleasing effect. Together with the distinct orange-yellow base, creates a combination of color hitherto unknown in Roses.

COLUMBIA (Hill, 1918)—It is a big Rose, the open flower measuring six inches across. The color is a true pink, about the shade of a perfect Shawyer, deepening as it opens to glowing-pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached and this color is enduring; a great Rose.

COUNTESS CLANWILLIAM (Hugh Dickson, 1914)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

CRIMSON CHATENAY—This is the Crimson Chateanay, a great Rose. All know the Mme. Abel

Chatenay. Well, this is a crimson form with all the other good qualities of its parent.

CRIMSON QUEEN—A very strong, upright grower, flowers large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom.

EDGAR M. BURNETT (McGredy, 1914)—Very large, full flowers of fine shape and form, with large flesh petals tinted rose. Undoubtedly the sweetest-scented Rose in existence, even surpassing La France in this respect; unequalled in its color as a bedding Rose. Gold medal, N. R. S.

ETINCELANTE (Chambard, 1914)—Bright brilliant red, shaded with purple, large, full and of fine form, opening into an enormous bouquet of fragrance; bud elongated, of brilliant velvety crimson color. Free flowering. Extra fine.

FLORENCE FORRESTER (McGredy, 1914)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white, the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.

FRANCIS SCOTT KEY (Cook, 1914)—An American seedling, raised by John Cook. It is a heavy double Rose of great substance. In color, red. It shows good growing characteristics and is undoubtedly a valuable variety. Throughout the summer this Rose was unequalled as a cut Rose and it is proving equally good in midwinter to be an excellent grower, opening perfectly and worthy of unqualified recommendation.

HYBRID TEA ROSES—Continued

G. AMEDEE HAMMOND (Alex. Dickson, 1915)—The color is cadmium or deep apricot egg yolk, shading off to fawn or delicate buff. Blooms large, full, perfectly formed; very floriferous and very fragrant. A great acquisition and a Rose we set great store on.

LADYS HOLLAND (McGredy, 1918)—Of magnificent form and size. Color buff, shaded orange-yellow, outside of petals pearly-peach. Very free flowering. Awarded a gold medal, National Rose Society of England.

GLOIRE DES BELGES (Chambard, 1916)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

GOLDEN EMBLEM (McGredy, 1917)—It is so perpetual flowering that as a garden and bedding Rose it is without a rival. At its best it surpasses Marechal Niel in shape and formation, and with its wonderful coloring is a most wonderful Rose. The coloring is yellow cadmium toning to sunflower-yellow. Altogether the most striking as well as the most remarkable variety among modern Roses. Awarded the gold medal of the National Rose Society of England, also the American Rose Society's medal at Philadelphia, April, 1917, for the best Rose not yet in commerce.

GORGEOUS (Hugh Dickson, 1915)—Flowers large and full, exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish-copper, the most charming and gorgeous coloring which has yet been introduced. The most striking Rose in existence. Gold medal, N. R. S.

HADLEY (Montgomery Co., 1914)—Hadley is a development from a line of seedlings raised by Alex. Montgomery, Jr., the varieties used in this development being Liberty, General McArthur and Richmond. In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.

HELEN TAFT (U. S. Botanical Gardens, 1914)—A rich cerise-pink. Flowers very large. A free bloomer and will become as famous as a bedding Rose as is the variety President Taft. Growth very strong. Keep your eye on this variety.

HENRIETTE—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery orange-crimson, changing to soft coral-salmon. Very hardy. Free in habit.

H. F. EILERS (Lambert, 1914)—Outer petals carmine-rose; center carmine and slate-blue red. Buds very long and pointed; flowers large and full with high center.

HOOSIER BEAUTY (Dorner, 1915)—We use description of E. G. Hill Co.: "If you need a more profitable red Rose that the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. As soon as thoroughly established in the soil it sends out long, stiff growths with a bud on every shoot. It does not need to be pinched like Killarney or Richmond, but produces, naturally, stems two to three feet in length; each plant keeps up a very close succession of bloom, and again unlike Richmond it is a good summer Rose. It is a clean grower, shows very little inclination to 'spot' or mildew; indeed, the variety is quite clear of both. It is an easy doer, grows side by side with Richmond and Killarney, and has become instantly popular and in heavy demand in the four cities where blooms have been sold, flower buyers through the section calling for it by name. We are describing the Rose very fully in response to questions asked us by intending purchasers." We believe this Rose will make its mark as a garden variety.

IMOGEN (W. Paul & Son, 1915)—Orange-yellow in center, shading towards the edge of petals to pale yellow and creamy-white. A great acquisition to Roses of its color.

KILLARNEY BRILLIANT (Alex. Dickson, 1914)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the

best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

LADY GREENALL (Alex. Dickson, 1914)—Intense saffron-orange, heavily zoned and overspread on deep creamy-white; reflex of petals faintly suffused delicate shell-pink, large, perfectly finished, very floriferous, strongly tea perfumed. A truly magnificent Rose.

Lillian Moore.

LILLIAN MOORE (Hugh Dickson, 1917)—No Rose ever has been offered to the public with the same credentials, having won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar-Trophy offered by the "Panama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles C. Moore. Color deep pure Indian-yellow with slightly deeper center; long buds; free bloomer. A gem.

LOS ANGELES (Howard and Smith, 1917)—Originators' description: "Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and every increasing wealth of color is maintained from the incipient bud until the last petal drops."

MADAME BARDON JOB (Dubriell, 1914)—Chromé-yellow and canary citron-yellow, large, full and cupped form. Very free flowering and very distinct.

MADAME COLLETTE MARTINET PERNET (Ducher, 1916)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

MADAME MARCEL DELANNEY (Leenders, 1916)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold Medal of the Bagatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

HYBRID TEA ROSES—Concluded

MADAME THEODORE DELACOURT (Pernet Ducher, 1914)—Reddish-salmon shaded clear yellow; large flowers of globular form; a rare color.

MARGARET DICKSON HAMILL (Alex. Dickson, 1915)—A magnificent Rose. Its delicate solid maize-straw color with delicate carmine on back of petals makes it an outstanding Rose. Gold medal, N. R. S.

MELANIE NIEDIECK (Leenders, 1916)—Flowers large and full, opening easily in all weathers. Color fine lemon-yellow. Growth vigorous, flowering continuously during the season. A fine garden Rose.

MISS WILMOT (McGredy, 1917)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S.

MRS. P. L. BAUDET—Color carmine-rose flecked with salmon-yellow, center darker. Flowers large and full, vigorous in growth, continuous in bloom. A unique two-tone Rose.

MRS. A. GLEN KIDSTON (Alex. Dickson, 1916)—Of the lovely type of "Lady Pirrie," and a perfect bedder. Color rosy-carmine, brilliant and attractive. Buds pointed with rich tea fragrance. Habit, branching growth, freely produced.

MRS. BRYCE ALLAN (Alex. Dickson, 1916)—Strong Moss-rose perfume. Color carmine-rose. Flowers globular in form, very erect stems, deep green foliage.

MRS. C. E. SHEA (McGredy, 1916)—Brilliant madder-red, shot with glowing scarlet. The outer petals show a deep rose shading on an orange base; very free, with a distinct perfume.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. HENRY WINNETT (Dunlap, 1918)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all the red or crimson varieties. The buds are long and well formed. A superb red Rose.

MRS. HUGH DICKSON (Hugh Dickson, 1915)—A grand Rose for any purpose. Deep cream with a heavy suffusion of orange and apricot, delightful perfume, one of the most beautiful and useful Roses. S. G. medal, N. R. S.

MRS. MACKELLAR (Alex. Dickson, 1915)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

MRS. SARAH YEATS (1917)—The color is a new and brilliant red. The petals are very large for a Rose and of splendid texture. Mrs. Sarah Yeats is not an experimental Rose, but one that has been successfully produced under ordinary greenhouse conditions. Stems run eighteen to forty-two inches long without pinching. It holds up longer after being cut than any of the red Roses.

NATIONAL EMBLEM (McGredy, 1915)—Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely and continuously.

RED LETTER DAY (Alex. Dickson, 1914)—An exceedingly beautiful Rose of infinite grace and charm. Its velvety, brilliant, glowing scarlet-crimson buds and fully opened cactus-like flowers never fade, as the reflex of the petals is satiny crimson-scarlet. Awarded S. G. medal, N. R. S.

RED RADIANCE (Gude, 1916)—The Washington Red Radiance. A glowing crimson sport of Radiance with all the magnificent qualities of the parent; the enormous globular flowers on heavy canes are a sight to be long remembered. This variety will be in very heavy demand as soon as it is known. The color is dazzling crimson-scarlet. An improvement on the other Radiance sports that have appeared.

ROSE MARIE (Dorner, 1918)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

ROSITA MAURI (Ketten, 1914)—Pure deep rose-pink; large, full, sweetly scented. Elongated bud. Extra.

SALLIE (B. R. Cant & Sons, 1915)—The flowers are large and full, outer petals creamy-flesh, gradually deepening towards the center of the bloom, with splashes of rich yolk or egg color. Awarded first prize at the International Show, Chelsea.

TIPPERARY (McGredy, 1917)—In color stands between Lady Hillingdon and Melody, showing an attractive shade of soft golden-yellow in the bud and half developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

TOTALE GELOS (Pernet Ducher, 1915)—A very vigorous grower of erect branching habit. Long bud borne on stout stem; large, full, globular flower, flesh-white color shaded with chrome-yellow in the center at the autumn blooming.

W. C. GAUNT (Alex. Dickson, 1916)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety vermillion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

- WILLIAM ALLEN RICHARDSON** (Ducher, 1878)—(N.) Very deep orange-yellow; medium size, but extremely showy and distinct; very attractive.
- ZELIA PRADEL** (Pradel, 1861)—(N.) Lemon-yellow, changing to creamy-white; very fine.

POLYANTHA OR BABY RAMBLER ROSES

Standard Varieties, including the Hybrid Polyanthas. They are Hardy.

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through the summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay, and anyone who attempts to handle Roses without including this class will bump into something real hard. They are useful, either pot grown or for bedding purposes or for hedge effects. Completely hide the plant with bloom from early till late.

ANNA MULLER (Schmidt, 1907)—This Rose is very much the same as the Crimson Baby Rambler, except in the colors of its flowers, which are a shiny, brilliant pink.

BABY RAMBLER, or MADAME N. LEVAVASSEUR (Lavasseaur, 1903)—This is the original Baby Rambler, daddy of them all. It is in bloom all the time, flowers in large clusters of brightest crimson.

BABY TAUSENDSCHOEN (Welter, 1911)—Its flowers are large and so much like "Tausendschoen." It is a bush form of the "Climbing Tausendschoen" or "Thousand Beauties" having all the charms in the variable coloring in its flowers that its parent has.

CATHERINE ZEIMET, or WHITE BABY RAMBLER (Lambert, 1901)—Grows to a height of twenty inches and produces double pure white flowers in abundance.

POLYANTHA OR BABY RAMBLER ROSES—Concluded

CLOTHILDE SOUPERT (Soupert & Notting, 1890)—(H. Poly.) Known the world over as one of the very best of all bedding Roses. The only rival of "Hermosa" as a bedder and market pot plant. The color effect is beautiful ivory-white, shading towards the center to bright silvery-pink. Everybody's Rose.

ELLEN POULSON (Poulson, 1912)—Dark brilliant pink, large and full, sweetly scented. Most floriferous. Very fine.

ERNA TESCHENDORFF (Teschendorff, 1911)—The flowers are of a deep crimson color, flushed with carmine, resembling the dazzling color of "Gruss an Teplitz." It is much sought after in America to bloom in pots during the winter and for Easter time.

JESSIE (Merryweather, 1909)—The flowers, which are produced in huge clusters, are of a bright cherry-crimson color which does not fade.

LE PONCEAU (Hemeray-Aubert, 1910)—Dark red, blooms in large clusters. A choice variety.

MARIE PAVIE (Alegatiere, 1888)—Borne in large clusters; color white, flushed with carmine; delightfully perfumed.

MADEMOISELLE CECILE BRUNNER (Ducher, 1880)—(H. Poly.) This is the popular Baby Pink or "Sweetheart" Rose. In the past year or two this Rose has fairly jumped into popularity. It has become quite the rage. It makes a handsome

miniature Rose, coming in sprays of three to five buds. Color blush, shaded light salmon-pink; distinct and desirable.

MOSELLA (Lambert, 1895)—(H. P.) Center of flower chrome-yellow; edges of petals shading out to creamy-white.

MRS. WILLIAM H. CUTBUSH (Levavasasseur, 1907)—It produces in constant profusion throughout the entire summer its pleasing delicate pink blooms in large trusses.

ORLEANS (Levavasasseur, 1910)—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any other Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and has made a sensation. Awarded gold medal.

PERLE D'OR (Dubreuil, 1883)—Nankeen-yellow with orange center; very novel and beautiful. This Rose is dividing honors with "Mlle. Cecile Brunner" as a cut flower, being planted very largely for this purpose.

POLYANTHA OR BABY RAMBLER ROSES Newer Varieties

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY FARBEKNONIGIN—This is a new baby Rose bearing flowers that in color are same as Farbenkonigin or Queen of Colors. Rosy-red. Extra.

CLARA STAHL—A fine pink Polyantha that is a winner. You know there is not an over supply of good pink Polyantas. Well, here is one that will surprise you. Try it. Bright pink.

GEORGE ELGER (Turbat & Co., 1913)—A lovely little golden-yellow Polyantha Rose with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

GRUSS AN AACHEN (Geduldig, 1909). (H. Poly.)—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing

to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

LE MARNE—Dwarf, perpetual flowering Polyantha. Semi-double flowers, bright salmon-rose at the edges, rosy-blush inside. Blooms abundantly and continuously in bouquets of fifteen to forty flowers. Has fine keeping qualities.

Mlle. FRANCISQUE FAVRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowering in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

PINK TAUSENDSCHOEN (Rosarie)—This is a bright pink form of Tausendchoen. A grand Rose from any standpoint.

TIP TOP, "Baby Doll" (Lambert, 1915)—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll-roses, a bunch of "Baby Doll" being an even parterre of delicious color.

HYBRID PERPETUAL ROSES, Newer Varieties

The first Hybrid Perpetuals were grown from crosses between Hybrid China and Tea Scented Roses with Gallica and Bourbon Roses. This is a beautiful class and cannot be too highly recommended, including, as it does, many of the hardiest early and late flowering kinds and nearly all of the superb rich crimson, red and pink varieties which make such pleasing contrasts to the yellow and white Teas. These are hardy.

DUCHESSE OF SUTHERLAND (Alex. Dickson, 1912)—Color, delicate rose-pink with lemon shading on the white base; charming.

GEORGE AHRENDTS—See Pink American Beauty.

GEORGE DICKSON (Alex. Dickson, 1912)—As near as we can describe it, the color is a velvety black-crimson, the back of the petal being heavily veined with deep pure crimson-maroon. We have regularly had blooms of the highest exhibition standard quite five inches across. It has wonderful lasting qualities, not only as to the retention of its color, but also in its shape and freshness. Awarded the gold medal of the National Rose Society of England, besides many other first awards at various other shows in England and Ireland.

HEINRICH MUNCH (Hinner, 1912)—Soft pink, very large and full; vigorous, fine for forcing in pots and for garden culture. Took the sweepstakes prize at the Boskoop Rose exhibition in June, 1913. This is without doubt the finest of all Hardy Pink Roses. It is a true Pink Druschki. Don't fail to try this Rose.

KING GEORGE V (Hugh Dickson, 1912)—The color is quite unique amongst Hybrid Teas, being rich blackish-crimson, with deep velvety violet flush, a striking and brilliant color, not burning in the

sun nor turning blue, as so many of our very dark Roses do. It is very free flowering and perpetual, and delights in a warm sun. The perfume is strong and very pleasing. Awarded the gold medal of the Festival of Empire, Crystal Palace, London, June 29, 1911. With us this Rose is a pure Hybrid Perpetual.

YELLOW AMERICAN BEAUTY, or LEMON QUEEN—A yellow form of the American Beauty. This is as wonderful in its way as White American Beauty.

PINK AMERICAN BEAUTY, or GEORGE AHRENDTS (Hinner, 1910)—This is the wonderful "Pink American Beauty." This Rose we predict will have as large a following and be as largely planted in a very few years as the now famous "White American Beauty." We have looked it over in the field and grown it in pots for the market, and we absolutely cannot detect a single fault in it or about it. The growth and make-up of the plants is superb, while the delicate pink color is unapproachable. Thank you, Mr. Hinner. You have enriched our Rose collection for all time. You know what some of you have missed by delaying so long in getting acquainted with "White American Beauty." Do not repeat this mistake with "George Ahrendts."

Color deep, bright, vivid, intense pink, with the penetrating fragrance of the old June Roses. We have grown this Rose for years, in sections of the country from Canada to the Gulf, and we have no hesitancy in saying after the most thorough and rigid test that a Rose can be put to that this Rose is in every respect just what we claim for it.

MRS. R. G. SHARMAN CRAWFORD (Alex. Dickson, 1894)—Clear rosy-pink; the outer petals shaded with pale flesh; one of the very finest Roses. Gold medal, N. R. S.

NOVA ZEMBLA (Mees, 1907)—A sport from Conrad F. Meyer, inheriting all the good qualities of its parent with the added merit that the flowers are pure white; full and sweet-scented.

PAUL NEYRON (Levet, 1869)—Deep rose; flowers of immense size; indeed many claim this to be the largest Rose grown.

PRINCE CAMILLE DE ROHAN (E. Verdier, 1861)—Deep velvety crimson-maroon, full and of good form and perhaps the best of all the hardy dark Roses.

ULRICH BRUNNER (Levet, 1881)—Cherry-red, of immense size; fine form and most effective in the garden.

VICK'S CAPRICE (Vick, 1893)—Large, full. Color bright satiny-pink, striped with white and carmine.

WHITE AMERICAN BEAUTY (Lambert, 1900)—We drop the German name Frau Karl Druschki and use this instead. This grand white Rose has become renowned as the very highest type of its class and the best snow-white Rose ever introduced. It is an extraordinarily strong grower, and has the vigor and hardiness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is a marvelous white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged. We grow "White American Beauty" literally by hundreds of thousands.

HARDY CLIMBING ROSES, Newer Varieties

and a few that are scarce including the Ramblers, Cl. Polyanthas, Wichuraiana, Multifloras, Hybrid Noisettes, Setigera and Climbing Chinas.

These Roses are suitable for planting where they can climb on walls, fences, galleries, porches, pillars, pergolas, arches, etc.; in fact, wherever a hardy climber is required. This list includes the Ramblers, Climbing Polyanthas, Wichuraianas, etc.

AMERICAN PILLAR (Conard, 1909)—(C. P.) A single flowering variety of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. They last in perfect form a long time, and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn. A great Rose to grow in pots for Easter.

CLIMBING AMERICAN BEAUTY (Hoopes Brothers & Thomas, 1911)—(H. N.) A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: "Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection." This Rose has already made its mark, and wherever it has been planted it has pleased, until today we sell it by the tens of thousands. You lose if you are slow to take hold of the "Climbing American Beauty." It grows and blooms.

CHRISTINE WRIGHT (Hoopes Bros. & Thomas, 1913)—(W.) A most exquisite new Rose, a cross between Caroline Testout and an unnamed seedling; it is of strong climbing habit, with large, heavy, dark green foliage, which is immune to disease. The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud and in the fully expanded flower; in color a most refreshing bright wild-rose pink; it flowers profusely during June, and continues more or less throughout the season.

GEISHA (Geschwind, 1914)—(C. H. P.) Brilliant scarlet-crimson. The long shoots are completely

covered with bloom the entire length. A wonderfully pretty Rose.

GOLDFINCH—This is the yellow-flowering "Tausendschoen." All know the good qualities of that superb variety. Well, this is a yellow form, and is attracting much attention and many favorable comments.

LE MEXIQUE (Schwartz, 1913)—(W.) Delicate silvery-rose, turning to rosy-white, reverse of petals light rose. Large for its class. Flowers full, opening well, produced in clusters. Continuous and perpetual flowering.

PAUL'S SCARLET RUNNER (W. Paul & Son, 1917) (W.) Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

SHOWER OF GOLD (Paul & Son, 1910)—(W.) The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (Henderson, 1910)—(W.) Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

SOURCE DE OR (Turbat & Co., 1913)—(W.) Color golden-yellow. A great acquisition, producing large panicles of flowers. A decided beauty.

SWEET LAVENDER (Paul & Son, 1912)—(Mtf.) Bright pale mauve or lavender, with golden stamens. Most distinct. Large bunches of flowers.

WICHMOSS, or "BABY MOSS" (Barbier, 1912)—(C. M.) This is a wonderful break in Roses, being a cross between the "Wichuraiana" and "Moss Rose." It has retained the scandent habit of the "Wichuraiana," making long growths five to eight feet in length with the glazed resistant foliage, while the bud is heavily mossed in bright green and has the peculiar aromatic odor of the moss family. The flowers are borne in clusters that are a daybreak-pink in color, opening into bloom that is a good semi-double in fullness. A climbing moss is a wonder; hardy.

HARDY CLIMBING ROSES, Standard Varieties

AVIATEUR BLERIOT (Fauque, 1910)—Saffron-yellow, center golden-yellow; full and double, flowering in clusters.

BALTIMORE BELLE (Feast, 1843)—(S.) Blush-white; in large clusters. A splendid hardy climber. An old favorite.

CLIMBING BABY RAMBLER, or MISS G. MESSMAN (Messman, 1911)—(C. P.) Everyone knows how Baby Rambler is always in bloom. This is simply a climbing form of Baby Rambler, embracing all its good qualities.

CRIMSON RAMBLER (Turner, 1893)—(C. P.) Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fine attractive hedge. Awarded gold medal, N. R. S. A Rose for the masses.

DOROTHY PERKINS (Perkins, 1902)—(W.) A most beautiful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented; quite first-class. Another Rose for the masses.

DR. W. VAN FLEET (Henderson, 1910)—(W.) Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center.

EXCELSA—See Red Dorothy Perkins.

EMPERESS OF CHINA (Jackson, 1896)—(C. C.) Bright pink; in large clusters.

FLOWER OF FAIRFIELD (Ludorf, 1908)—(C. P.) A counterpart of Crimson Rambler in every respect, except that it shows ever-blooming tendencies, many new growths being terminated with a large cluster of flowers.

FORTUNE'S DOUBLE YELLOW, or BEAUTY OF GLAZENWOOD (Fortune, 1845)—(H. N.) Yellow, flaked with carmine. This is a great Rose in California, where it is seen at its best, although suited for general planting.

GARDENIA (Souper & Notting, 1900)—(W.) Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HIAWATHA (Walsh, 1905)—(W.) Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color it is brilliant, ruby-carmine, with a clear white eye and a mass of golden stamens.

LADY GAY (Walsh, 1903)—(W.) Flowers of a deep cherry-pink, shading on the edge of the petals to a very delicate soft tone of pink.

MADAME ALFRED CARRIERE (Schwartz, 1879)—(H. N.) Pure white, suffused with yellow at base of petals; very free and very fragrant; fine for arches and pillars. In Oregon it grows to the roofs of two-story houses, covering the entire side or end of a large sized house, and simply a wilderness of blooms.

MARY WASHINGTON (Origin unknown)—(Mtf.) Pure white, perfectly double, in immense clusters; fine.

PAUL'S CARMINÉ PILLAR—Very early. The flowers are large and very showy, of a rich rosy-carmine, with white eye.

PHILADELPHIA RAMBLER (Conard, 1902)—(C. P.) Glowing crimson; large clusters; fine.

PRAIRIE QUEEN (Feast, 1843)—(S.) The old standby red climber. It is so hardy that it delights in the climate of Alaska and Canada.

HARDY CLIMBING ROSES, Standard Varieties—Concluded

RED DOROTHY PERKINS, or EXCELSA (Walsh, 1909)—(W.) It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsa as a brilliant Crimson Rambler flower on glossy, varnished Wichuraiana foliage. The defects of Crimson Rambler are its unsightly foliage in unseasonable weather, and its detestation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

RUSSELL'S COTTAGE (Origin unknown)—(Mtf.) Dark red; double and full; very hardy.

SEVEN SISTERS (Origin unknown)—(Mtf.) Crimson to white and all intermediate shades; extra. An old favorite.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (Schwartz, 1906)—(C. P.) The flowers upon first opening are the most delicate shade of pink ever

seen in a Rose, might be described as a white, delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring; will become as famous as Crimson Rambler or Dorothy Perkins.

TENNESSEE BELLE (Origin unknown)—(Mtf.) Beautiful pink; free bloomer; an old standby.

TRIER (Lambert, 1904)—(C. P.) Large clusters of creamy-white blooms, with dark yellow anthers, flowering freely.

VEILCHENBLAU, THE BLUE ROSE (Schmidt, 1909) (C. P.) This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (B. R. Cant, 1908)—(W.) It has been the cry of nurserymen for years for a white climber that would rank up with Crimson Rambler, and now we have the pleasure of offering this White Dorothy Perkins, that in every way is the equal, if not superior, to Crimson Rambler as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

YELLOW RAMBLER, or AGLAIA (Lambert, 1896)—(C. P.) Bright yellow changing to canary-yellow; produced in pyramidal clusters of fifty or more blooms.

MOSS ROSES

These are probably a sport of the Cabbage Rose. The origin of the double Moss Rose is left to conjecture. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

ELIZABETH ROWE (Rowe, 1866)—This is an old favorite with its large deep pink buds well mossed. A beauty.

HENRI MARTIN (Portner, 1863)—Large, full flower of deep red; well mossed; fragrant.

MOUSSELINE (Robert and Moreau, 1881)—Pure white flower, buds heavily and beautifully mossed.

PRINCESS ADELAIDE (Laffay, 1845)—Deep bluish-pink with buds that are thoroughly mossed.

LE POILU (New Hybrid Moss)—Very fine, vigorous bush, with long, heavy branches bearing large, thick foliage of Moss Rose type. The flowers are produced in bouquets of eight to fifteen; large, double and well formed. Color, satin-rose, shading to heliotrope, and nicely mossed.

MISCELLANEOUS ROSES

Under this heading are listed all the Roses not embraced in the different families or types that we name in the preceding pages.

AMOENA, The Pink Flowering Cherokee Rose (Hockbridge, 1909)—(L.) The flowers are the same as the White Flowering Cherokee, except that the color is a glowing pink with a golden-yellow center. Resembles huge apple blossoms.

ARTHUR R. GOODWIN (Pernet Ducher, 1909)—(A. B.) This is a genuine "Pernetiana," and is perfectly hardy everywhere. The color is coppery orange-red, passing to salmon-pink as the flowers expand. A superb combination of color.

DOUBLE LAEVIGATA, or the Double Flowering Cherokee (California, 1900)—(L.) A beautiful hardy Rose, bearing double white flowers; very fine. Foliage is very distinct.

LAEVIGATA, the Single White Cherokee Rose (Lindley, 1820)—(L.) This is the famous Cherokee Rose so well known in California. Large, pure white flowers with center filled with golden-yellow anthers.

MADAME EDWARD HERRIOTT (Pernet Ducher) (A. B.) "The Daily Mail Rose." Winner of the gold cup which was offered by the London Daily Mail, for the best new Rose, exhibited at the International Horticultural Exhibition, held in London, England, May, 1912, and to be known as the Daily Mail Rose. In competition with the world's greatest rosarians this much coveted prize was awarded to M. Pernet Ducher for this wonderful novelty. It was again exhibited in London on May 1, 1913, at the exhibition of the National Rose Society of England, where it was awarded the Society's gold medal. M. Pernet Ducher describes its color as follows: "Buds coral-red, shaded with yellow at the base, the open flowers of medium size, semi-double, are of a superb coral-red, shaded with yellow and bright rosy-scarlet, passing to shrimp-red." A wonderful Rose. The bud is long, slender and pointed, the color is like sunshine on a copper-red metal.

MADAME GEORGES BRUANT (Bruant, 1888)—(R.) Paper white, larger, very free and distinct, flowering in clusters; most beautiful.

MURIEL DICKSON (Austrian Briar)—Color deep reddish copper, opening cherry-red with coppery

shadings. Distinct and very valuable. Buds long, elegant and pointed, freely produced throughout the entire summer. A grand bedding variety.

NEW CENTURY (Conard, 1891)—(R.) A grand Rose that is entirely hardy, bearing beautiful silvery-pink flowers in clusters. This Rose is in bloom all the time.

SIR THOMAS LIPTON (Conard, 1905)—(R.) The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant.

VISCOUNT ENFIELD (Pernet Ducher, 1910)—(A. B.) Coppery old-rose, shaded with yellow. The inner petals are deeply tinted with carmine, while the center ones are sometimes striped with yellow.

WHITE BANKSIA, or Lady Banks (Keer, 1807)—(L. B.) A vigorous grower, in California growing to the top of tall trees and completely enveloping the entire tree; small double, pure white flowers in clusters, with true violet fragrance. Indeed, if one were blindfolded, he could not detect the odor from Violets. Very desirable.

WICHURAIANA, or MEMORIAL ROSE (Dr. Wichura, of Japan, 1886)—(W.) It is difficult to conceive anything more appropriate, beautiful and enduring for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. The flowers are produced in lavish profusion in July. They are single, pure white, with a golden-yellow disc, five to six inches in circumference. It is also immensely valuable as a Climbing Rose, covering arches, fences, etc.

WILLOWMERE (Pernet Ducher, 1913)—(A. B.) Color rich shrimp-pink, shaded yellow in the center, and toning to carmine-pink towards the edges of the petals. Vigorous growth, and erect, branching habit. Long carmined coral bud on long, stout flower stalks.

YELLOW BANKSIA, or LADY BANKS (Damper, 1827)—(L. B.) Same as White Banksia, except color of bloom is sulphur-yellow. Has the same delicious Violet fragrance.

SPLENDID PEONIES

Hardy Everywhere---"Aristocrat of Flowers"

The wonderful improvement made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of our fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit our field will say, "I have Pink and White Peonies. I desire only Red ones," but when they are shown the Pink and White, they invariably exclaim, "How grand! I have none like them." There is as much difference in Peonies as there is in Roses.

Sizes of Peonies

DIVISION indicates a Peony root divided until it has from two to five eyes.
ONE YEAR—This is a division planted and grown one year.
TWO YEAR is a one year left in the ground another year.
THREE YEAR indicates the two-year plants left for three years from division undisturbed, and sold you as it comes from the ground.

"Peonies for Pleasure"

This book of "Peonies for Pleasure" gives you information on "Peony History," "Nomenclature," "Six Points of Excellence," "A Month of Peonies," "The Lure of the Peony," "An Appreciation," about Peony culture, soil, drainage, fertilizers and how to apply; planting time and how to plant; varieties for cut flowers; how to grow exhibition flowers. This book describes over two hundred of the choicest kinds. If you want information on the plant that stands next to the Rose in beauty, that is practically known to the amateur as simply a red, white and pink Peony, then send today for "Peonies for Pleasure."

TIME TO BUY PEONIES DURING THE FALL SEASON

The proper time to buy and plant Peonies is from September 1st until the ground freezes up. The plants we offer are field-grown divisions with two to five or more eyes, commonly known as one-year plants.

For Peonies, both old and new varieties, not named in this Catalogue, see "Peonies for Pleasure." Write today for it.

300—**LADY ALEXANDER DUFF** (Kelway, 1902)—Here we have a beauty, in fact we have no hesitancy in saying that "Lady Alexandra Duff" is the one outstanding Peony in our entire collection of over seven hundred varieties. That is to say, it has such great charm and beauty coupled with its many other good qualities as to stand out ahead of every known variety. When we say this we know exactly what we are saying. In the first place every stalk grows upright and it bears its flowers so that every single one looks at you. This is a most desirable quality. Then every petal of every flower is three inches or upwards across. Then the color is such a charming shade of pink, changing to white. There are many spurious kinds being sold. BEAUTIFUL FERNS

The Grand New Dwarf Fern, "Teddy Junior"

The Fern for Every Household.

This is known to the trade as the greatest of all Nephrolepis. No Fern can equal it. See what a fine plant it makes. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

"Teddy Junior,"
the Wonderful New Fern.

Nephrolepis John Wanamaker

"The Wanamaker Boston Fern"

A "sport" from Nephrolepis Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Nephrolepis. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

Nephrolepis Splendida

The Big Four Fern

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of the "Fish Tail." 2 1/4-inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

"Big Four Fern."

Nephrolepis Piersonii

The Gold Medal Fern

(See illustration page 26.)

This is a strain that we have, by selection, improved so it runs back but very little. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

Fronds of the Roosevelt Fern.

Nephrolepis "Roosevelt"

The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants, a far greater number than was ever sold of a new Fern. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

Nephrolepis Elegantissima

The Philadelphia Lace Fern

This is a greatly improved Elegantissima, not running back nearly so much as the old form. Dozen, 75 cents; hundred, \$5.50; thousand, \$50.00.

Roosevelt Fern.

BEAUTIFUL FERNS—Continued

Goodii, or "Baby's Breath Fern."

Nephrolepis Goodii

The Baby's Breath Fern.

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. Nothing is daintier or more exquisite than well-grown specimens of any size. Our reputation for it that no Fern in existence can compare with Baby's Breath in fluffiness. Two and one-quarter inch pots, \$1.00 per dozen; \$6.00 per hundred; \$55.00 per thousand.

Nephrolepis Whitmanii

The Ostrich Plume Fern.

This is the well known fluffy leaved Fern; beautiful. Two and one-quarter inch pots, 60c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

Ostrich Plume Fern.

Nephrolepis Bostoniensis

The Boston Fern.

A variety that needs no description. By many called the Fountain Fern on account when grown into large plants it droops gracefully. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

Nephrolepis Exaltata

The Old Original Sword Fern

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the Nephrolepis we offer sprung. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. Two and one-quarter inch pots, 60 cents per dozen; \$5.00 per hundred; \$45.00 per thousand.

Boston Fern.

BEAUTIFUL FERNS—Concluded

Nephrolepis Scotti

The Newport Fern.

It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. 2¼-inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

Nephrolepis Whitmanii Compacta

The Parlor Fern

This is a condensed form of the "Ostrich Plume Fern," with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description. 2¼-inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

Newport Fern Scotti.

Nephrolepis Davallioides Furcans

The Fish Tail Fern

This is a grand Fern, entirely distinct from any of the other varieties of Nephrolepis. Throughout the South and especially at New Orleans, this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the Nephrolepis. Grand for house culture. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

Fish Tail Fern.

Nephrolepis Superbissima

The Fluffy Ruffles Fern

Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth being much more compact, and its irregular shaped fronds which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. Two and one-quarter inch pots, \$1.00 per dozen; \$8.00 per hundred.

Piersonii, or "Gold Medal Fern."

(See description page 24.)

Nephrolepis Scholzei

The Crested Fern

The fronds, like in Scotti, stand erect, and with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

Dwarf Ferns for Fern Dishes

These Dwarf Ferns are used by the hundreds of thousands to fill dishes for table decorations. Our sales each year exceed fifty thousand plants. Our stock is in prime condition, ready to use at once. We offer six choice varieties. 50 cents per dozen; \$3.50 per hundred; \$30.00 per thousand.

Dwarf Ferns for Fern Dishes.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen.

Price, one-year field grown plants, 60c. doz.; \$4.00 per 100; \$35.00 per 1,000.

The Wonderful Lemon Ponderosa

A Fine Pot Plant for Florists' Sales

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful Lemon has. It is the true ever-bearing variety. The Ever-Blooming Butterfly Bush *Buddleya Variabilis Magnifica* (Butterfly Bush)

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was among them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vieing with it in brilliancy of color. This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of

miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. **Pot grown. Dozen, 75 cents; hundred, \$5.00.**
